

2020: KEY DATA REVIEW

– SPECIAL REPORT

The report highlights the important data insights which not only defined 2020 but will also shape 2021. It provides an analysis of key 2020 data from various higher education data sources.

Our review provides a clear, concise, and insightful view of the important indicators of the performance of the higher education sector in Australia in one report. It also provides some indication of what the likely scenarios could be for the performance of the sector in 2021.

The report provides **data visualisations** which will enable higher education institutions to easily and quickly identify the **important trends** and take-aways from what was an incredibly challenging year.

The report will arm institutions with a greater understanding of the current state of the market and **will assist you in forming strategies to enhance international student recruitment efforts in 2021.**

We present key data related to:

- **Important trends in international student enrolments and commencements for the higher education sector.**
- **Performance of top international student recruitment markets.**
- **Enrolment and Commencement trends by State and Territories.**
- **Enrolment trends by broad field of study.**
- **Looking ahead and providing possible scenarios for 2021 in relation to the number of commencements and enrolments.**

This is an essential report to assist you with the challenges we face in 2021 and would be a useful tool to easily circulate among relevant stakeholders within your institution.

It will be sent as a PDF and Excel file and is available for purchase for \$895 (excluding GST).

Credit card payments are also accepted if preferred.
